

The addition of the traffic and weather channels available through XM Instant Traffic & Weather has made my daily commute and over-all driving safer, more energy efficient and environmentally sensitive. No other local medial provide as efficient and up-to-date a public service. I pay for this service and would consider this yet another infringement on consumer rights in favor of the increasing tendency of the FCC to favor Large Corporate interests over citizens needs and rights. I appeal to you to reject the NAB's petition 044-160!
